

The Thrifty 150 Foamer™ is a revolutionary product that combines time-tested savings of the original Thrifty Dipper with the unique, full coverage of foam for 100% teat coverage every time. By applying the dip directly from the tote to the teat, there are no spills while extremely limiting any dip waste.

Best of all, the Thrifty 150 Foamer™ is low maintenance. Take the challenge to try our 30-day 100% customer satisfaction money-back guarantee and see your savings start adding up today.

HERE IS WHY THIS PRODUCT IS SO EFFECTIVE

1. Teat passes through foam, then the brush
2. Saturated brush bursts bubbles of the foam
3. The brush forces the dip into every nook and cranny on the teat
4. As you remove the cup, foam re-attaches to the skin of the teat
5. In pre-dipping, the cows' teats clean better than a traditional application method
6. When post-dipping, the foam stays on the teat, moist and active at least 30 minutes longer than liquid. This allows the conditioners to be absorbed into the skin of the teat

THRIFTY 150™

The NEXT generation in dipper technology

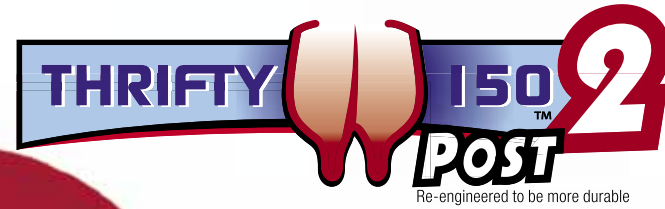

"The best is now better! The Thrifty 150™ is our finest dipper yet, saving 50% more dip than the Thrifty Dipper™. It's guaranteed to save you money." —Dennis Hakes, Owner

- Thrifty 150™ Pre is designed to better clean and prepare teats for milking
- 100% teat coverage
- Paints teat from upper chamber
- Extremely limits any dip waste or spilling
- Transparent upper chamber **vital** to manage savings
- Low maintenance

All dip originates from the brush

Our transparent cup provides vital information to be able to save dip

Alternately, your dip cup can be customized to keep some dip in the upper chamber (You decide how much is right for your dairy)

All dip originates from the brush

Use 4 gallons of dip per 100 cows per month (about 150 cows per fill)

Guaranteed for 100% teat coverage to minimize dip expenses

Patent-pending design limits spilled dip

Transparent upper chamber confirms savings

Can your dip cup do this?

GUARANTEED 50-80% Savings in Pre- & Post-Dip Usage When Using THRIFTY DIPPER over Standard Dip Cups!!

The ORIGINAL

U.S. Patent #7,387,086

The Super Switch® Adaptor

"The JAH"

Makes dirty udders and teats a thing of the past.

Three Reasons Every Dairy Needs This Tool:

1. Skin coverage with pre-dip increased dramatically and cleaner teats always equals lower SCC's
2. Cows are super-stimulated. Milk letdown is immediate, which means less time on the machine
3. **COMBINES PRE-MILKING PROCEDURE INTO ONE STEP - STRIP, DIP & SCRUB**
